

# Laboratory Equipment List Spreadsheet

*Carol A. Budd*

*Biology Department, St. Lawrence University  
Canton, NY 13617*

A student-generated Lotus-123 spreadsheet which outlines laboratory equipment lists for an introductory biology course is used at St. Lawrence University. Useful facilities included: (1) macros to print designated lists without redefining print ranges; (2) an imbedded recalculation of solution quantities and equipment needs based on number of students input; and, (3) an easy keystroke command to move from the Table of Contents to any desired list of laboratory equipment.
